In a coupled trailer with working fog lamp, the fog lamp of the vehicle will be switched off, if applicable.

7-pole wiring-harness kit with a C2 telltale.
A defective indicator light of the car or/and caravan/trailer is stated by a quicker flashing of the other indicator light (Following the European directive 76/756/EEC § 4.5 and StVZO § 54). The functioning of the C2- telltale can be tested by connecting the trailer/caravan (or a test-box) and switching on the indicator lights with a removed indicator light. The other indicator lights will flash quicker. (ATTENTION: a test-box on which only LED's are being used, can not be used in this case).

The wiring kit has a possibility to switch off any Park Distance Control in the case of a coupled trailer.
