

PRODUCT NEWS: BMW 3 Series (G20) 03/2019 – BMW X5 (G05) 11/2018 -

BMW Have revised the architecture for the new 3 series and also the later G05 X5, due to the change using the old kit led to problems with ESP warning lights being triggered so this had led to us developing a new kit for these vehicles. Please be aware these new kits are read only due to the architecture change. For any more information please contact technical support.
